

Ayman Mohammed Shabbir

ABOUT ME

Computer Science graduate specializing in Data Science with knowledge of Python, SQL, machine learning, and web development. Eager to apply problem-solving skills and contribute to real-world software and data-driven solutions.

WORK EXPERIENCE

SALESFORCE VIRTUAL INTERN

May 2024 - Jun 2024

SmartInternz

Remote

- Wrote SOQL queries to retrieve and manage Salesforce data.
- Developed basic Apex classes and triggers as part of hands-on exercises.
- Built automated business workflows using Process Builder and Flow Builder.
- Worked with Salesforce CRM concepts including data modeling, object relationships, and security features.

FULL-STACK WEB DEVELOPER

Feb 2026 - Jun 2026

Starz Multi Specialty Dental Care

Hyderabad

- Designed and developed a responsive clinic website using Next.js, React, Tailwind CSS, and Supabase.
- Implemented secure staff authentication and patient record management.
- Collaborated with the client to gather requirements and incorporate feedback.
- Deployed the application on Vercel and configured a custom domain.
- Optimized the interface for desktop and mobile devices.

EDUCATION

B.TECH. IN COMPUTER SCIENCE AND ENGINEERING (DATA SCIENCE)

2025

Mahatma Gandhi Institute of Technology

Hyderabad, India

- GPA: 8.19

SKILLS

- Programming: Python, SQL
- Web Development: React, Next.js, Flask, HTML, CSS, Supabase
- Data Science: Pandas, NumPy, Scikit-learn, Tableau
- Tools: Git, GitHub, VS Code

PROJECTS

Morse Vision

- Developed a real-time Morse code translation system using eye-blink detection.
- Applied computer vision techniques (OpenCV, dlib) for facial landmark detection.
- Converted blink duration patterns into text using a custom Python Morse engine.
- Built a simple web interface using Flask and HTML/CSS.

Tableau Visualization

- Created interactive dashboards using Tableau with Netflix and Tripadvisor datasets.
- Cleaned and organized datasets to create clear and meaningful visualizations.
- Applied data visualization techniques to identify trends and summarize insights.
- Strengthened practical skills in data preparation, dashboard design, and visual storytelling.

Game Recommender

- Built a content-based recommendation engine using NLP and cosine similarity.
- Processed and vectorized game metadata (descriptions, developers, categories, genres) for similarity analysis.
- Applied text preprocessing, stemming, and feature extraction to improve recommendation accuracy.
